

IEEE Power & Energy Society SCHOLARSHIP PLUS INITIATIVE™

Preparing the Next Generation of Power & Energy Engineers

If you're an undergrad in electrical engineering or considering it, you may be eligible for scholarship money and real-world experience in one of the most rewarding and future-facing careers for new graduates.

Here's What You May Receive

If you qualify and are selected, you can:

- Receive up to three years of financial support (total of US \$7,000)
- Gain career experience through internships and co-op work
- Become a member of IEEE, the world's largest technical association
- US Veterans eligible to be considered for the IEEE PES G. Ray Ekenstam Memorial Scholarship
- Be eligible to receive an additional US \$5,000 annually through the John W. Estey Outstanding Scholar Award

How to Qualify

Applicants must have a GPA of 3.0 or higher on a 4.0 scale (or equivalent), be working toward a bachelor's degree in electrical engineering and be willing to take courses in power and energy engineering. You can apply during your freshman year. Students attending a community college can also apply provided you'll be a full-time student in the coming academic year at a university or college in the U.S. or Canada. The application period is March 1st to June 30th.
